WORK EXPERIENCE

EDUCATION

Gokaraju Institute of Engineering and Technology

Bachelor of Computer Science and Engineering - No GPA Yet

June 2023

- 1st Year Student

PROJECT

NoobScience

Summer 2023

- A Simple and Effective Portfolio Site built using multiple technologies like Next.js, Astro.js, MongoDB, etc
- The Same site was rewritten multiple times using React, Next.js, Astro.js (current)
- https://github.com/newtoallofthis123/About_next/ (next.js)
- [https://github.com/newtoallofthis123/About_\(react\)](https://github.com/newtoallofthis123/About_(react))
- https://github.com/newtoallofthis123/About_astro/ (astro.js)

NoobPaste

Winter 2022

- A self hostable pastebin alternative
- Built using Flask, Jquery and Postgresql
- One of my first full stack applications
- Includes features like password protection and authentication

CMS

Summer 2023

- A simple to use CMS built for my site written in typescript and uses MongoDB.
- For internal use by maintainers of noobscience.rocks
- The CMS is highly integrated with the main site, so it is hard to see it separate.
- https://github.com/newtoallofthis123/About_next/pages/admin

Peep

Winter 2022

- Peep is a simple command line tool that acts as an abstraction for performing simple python operations without writing multiple scripts
- Can perform basic functions like reading a file with syntax, generating QR codes, act as a small editor, search from terminal etc
- <https://peep.noobscience.rocks/>

SKILLS

TypeScript ●●●●●

Next.js ●●●●●

Javascript ●●●●●

Flask, Django ●●●●●

Python ●●●●●

Web Technologies ●●●●●

- Python
- Javascript
- Typescript
- C
- Rust
- Python Frameworks (Flask, Django, Numpy)
- React
- Web Frameworks like Next, Astro
- Figma and a little UI/UX
- Database Management (Postgresql, MongoDB, etc)
