Welcome!

My name is Ishan, and I am a computer science and engineering student at GRIET. I am passionate about coding and have a strong proficiency in Python and JavaScript. Additionally, I have a good understanding of databases and how they work. Along with my love for coding, I also enjoy going for long walks as it helps me clear my mind and rejuvenate my energy. I am a cool, friendly person and would love to connect with like-minded individuals.

EDUCATION

GRIET (November 01, 2022 - June 08, 2026)
B Tech, Computer Science
Stands for Gokaraju Rangaraju
🔗 https://www.griet.ac.in/

Computer Science and Engineering

Sri Chaitanya (June 03, 2020 - June 09, 2022)
Intermediate, MPC 9.8
Studied in Sri Chaitanya junior college in classes 11 and 12

Intermediate

SKILLS

Front End Development
Moderate

frontend   react

Backend Devleopment
Experinced

flask   javascript

Database Managment
Beginner

Postgres   SQLite

Git and Github
Moderate

github   git

ABOUT ME

My Journey
It was quite fun

Initiated my programming journey during senior year of high school, immediately developing a passion for the dynamic world of computer science. Proven proficiency in Python, with experience in JavaScript and database management. Continuously seeking to expand technical skills and knowledge

Me
I am quite fun

As I embark on my college years, I am filled with anticipation for the opportunities and challenges that lie ahead. My passion for computer science and programming drives me to continually pursue new projects and challenges, with a focus on creating functional and user-friendly solutions. In my free time, I find great pleasure in going on long outdoor walks with my dog. I am eager to expand my professional network and would be delighted to connect with like-minded individuals, kindly reach me at noobscience@duck.com.

PROJECTS

NoobPaste (September 19, 2021 - Present)
NoobPaste is an open source alternative to pastebin.

NoobPaste is an open source alternative to **pastebin.com**. Its back end is written using flask, and it's frontend is plain JavaScript with jQuery. It also uses a postgresql database

`flask` `full stack`

Portfolio Site (December 10, 2022 - December 22, 2022)
My Beautifully Designed Portfolio site built with React

Designed and implemented a Portfolio Site to implement production level react and to showcase me and my projects.
